Local Carnival Report Proceeds For Swimming Pool

Turned Over to Bank By Jack Hope and Bert Allison

As a result of the carnival which was held two weeks ago we are glad to report that those who were instrumental have turned over a nice sum for the erection of a new swimming pool here this year.

The following is the report submitted by Mr F V Ellis who was appointed auditor by Messrs B Allison and Jack Hope who had undertaken the carnival.

Redcliff Swimming Pool Receipts
Jan. 1st 1938 \$213.41
Receipt from Carnival
and sale of Tickets 689.72

Total \$903.20
Disbursements
Carnival Merchandise
Expenses \$244.55
Cash on Hand
In Bank 658.65
Total \$903.20

Prominent Albertans Act in Unity Council

Six New members Have Already
Been Appointed

Agreement of six prominent Albertans to act in the Provincial Unity Council, was announced by John I. McFarland, Calgary, this week.

The new Council members are: Mr. Irene Parbury, A. J. Percy, P. J. International, Grade, W. D. Spence, former Deputy Minister of Municipal Affairs and chairman of Alberta Tax Commission, Edmonton; Francis Austin, farmer, Banff; J. Harold McLaughlin, farmer, Spruce Grove, and D. McInnis, farmer, Carleton Place.

Names of additional men and women to bring the council to a total of 30 will soon be announced by Mr. McFarland, and a meeting in early summer is scheduled.

Cancer Preventive Meeting Held in Hat

Rev H V Ellison and Dr Lewis
Attended the Meeting

Dr Lewis and Rev. H V Ellison Pres, of the local Red Cross

Mother's Day Service In Gordon Memorial

Will Be Held Morning and
Evening Coming Sunday

Gordon Memorial Church will commemorate the name of Mother on Sunday May 8th. A United Service of Sunday School scholars and church members of all ages, will be held at 11 a.m. A program specially prepared for the occasion will be used, and the Junior Choir will give suitable musical numbers. The minister will give a short talk on John Wesley's Mother.

The Evening Service will also be dedicated to Mother's Day. The Senior Choir will give special numbers, and the minister will speak on the subject, "Mothers of Yesterday, To-Day and To-Morrow."

Number of Farmers After Seed Grain

Farmers in This District Apply
in Hat Court House

Mr. D. Wylie of the department of Agriculture stated there appeared to be a great deal of misunderstanding exists with regard to the amount of seed grain relief to be distributed. The distribution is based on the regulations which state that when an applicant has available land in condition for seeding amounts to seed may be provided at the rate of 45 pounds to the acre.

Seed relief office in Medicine Hat has had a continuing stream of farmers seeking supplies. 7,700 bushels of wheat were distributed last Friday and Saturday and 700 more applicants have been proved as they could not get enough seed.

Society attended a meeting in the Canadian Society for prevention of cancer, held in the Nurses Home of the Hospital in Medicine Hat on Tuesday evening. The guest speaker of the evening was Dr. McGuffin of Calgary who gave a very educational talk on the means and methods, that are at work in Canada for the prevention of cancer, and made a strong appeal for the organization in every community, of a Lay Medical Association for the prevention of cancer.

Concrete action is to be taken later, with the purpose of organizing as many of these councils as possible.

School Concert Held Last Friday Evening

Pupils Did Well for the Annual
School Festival

The concert given by the school children on Friday evening in Gordon Memorial school room was fairly well attended. The selections were those competition numbers to be rendered at the School Music and Dramatic Festival which is being held today and tomorrow in Medicine Hat.

The several solos, recitations, choruses and dramatic numbers were well rendered and received great applause from the audience. The teachers and children deserve great credit for the work they have done and the Review wishes the competitors all success in the Festival competitions. The concert was given as a means of raising funds to help defray expenses of transportation etc in connection with the festival and deserved a much larger attendance. The teachers have always given a good account of themselves at Festival time and certainly deserve the wholehearted support of all the parents in the town.

Redcliff Family Met Car Accident in Hat

Stanley Gilson and Family Were
Struck by a Truck

Stanley Gilson of Redcliff met with an accident in Medicine Hat Monday when he was in a car with his mother in law and family.

Their car was struck by an oil truck and the occupants were badly shaken up. Mrs. Stanley who was in the car suffered a slight head bruise, and which Mr. Gilson also received a slight bruise but his wife and child were uninjured.

Gilson's car was slightly damaged.

Popular Young Lad Passed Away Friday

Fred Blades Age 17 Years, Son
Of Mr H Blades

Seldom has it been our painful duty to record in these columns a sadder death than that which befell Frederick Henry Blades of this town last Friday morning in the Medicine Hat hospital.

Fred, who was a bright boy of only seventeen years of age, had been confined to his bed for several months suffering with rheumatic fever which seriously affected his heart.

On Thursday evening his condition was so much worse that he was removed to the hospital in Medicine Hat where he passed away Friday morning.

Fred was the eldest son of Mr. H. Blades, a small child and has resided here ever since.

He leaves to mourn his loss his father, two sisters, Mrs. Ellen Johansen and Mr. & Mrs. Elsie also a younger brother William. The sympathy of the whole community goes out to Mr. Blades and his family in their sad bereavement.

The funeral was held on Sunday afternoon at 3 o'clock from St. Barnabas Church, Medicine Hat. Rev. H. S. Hannell officiated and interment was made in the Anglican section of the Hillside Cemetery. The pallbearers were Douglas Lemming, Norman Rindahl, David Floyd, H. Mosholm, D. Lemming, D. Johnson, and B. Collard.

A large number of floral wreaths were sent by relatives and friends.

Young John Bulyea, who met death in a avalanche of snow last December, a brother of Mrs. Ward who resided here, his body will not likely be found until the end of June it has been stated by officials. His father had been heading the search party at Lake O'Hara but had to return.

Red Cross Drive Starting May 20th

Redcliff Branch to Have May
Drive in Future

In co-operation with the Alberta Division, which is holding a province-wide drive for members and friends during May, the Redcliff branch will put on its Annual Drive starting May 20th. This will bring it to the 1937 drive which already have been held in Sept. and was completed till Jan. of this year. We hope to keep to May in future and not have it in June again.

The Alberta Red Cross has provided free medical and hospital care to 136 crippled children during 1937. Redcliff alone donated value of \$66,000. was valued to 5,954 families.

In any emergency the Red Cross must be prepared.

Have a heart give generously.

Canadian Pacific Rly. Staff Foundation Library

Will Furnish Much Information
For Citizens and Employees

Something new in group education for adults is to be found in the newly published Staff Foundation Library of the Canadian Pacific Railway. The ten books comprising this library cover all phases of the company's operations in addition to encouraging study designed to make Canadian employees better citizens. The books were arranged and edited by John Murray Gibson, general publicity agent of the Company.

A selection of the books follows: "The requests of many employees for a reading guide and source of information on matters affecting citizenship," citizenship, such as Canadian history, geography, and economics. The name "Foundation Library" has been applied because it is hoped that reading of the books will encourage company employees. Sir Edward Beatty made the cheapsure possible, by ruling that the company should absorb more than half the cost of the books.

These books are C. P. R. facts and figures and "Factors in rail way and Steamship operations." Diagrams show how the C.P.R. dollar is earned and spent, and articles dealing with such subjects as Atlantic and Pacific fleets.

Other books are: "Speaking in Public," and enlarged for use of study groups and debating clubs. "Correspondence and Economics" for Canadian readers. "The History of Canada" and "The Dominion of Canada" as economic geography. "An Introduction to Through Biography" "Canadian Songs" containing 188 familiar songs arranged for four voices suitable for the piano.

The Ladies Aid of Gordon Memorial will hold their annual sale of fancy work and other useful articles, also home cooking and afternoon tea in the basement of the Church May 11 at 3 p.m. Everyone invited.

Premier Honors Won By Redcliff Boxers Last week

Harrison Awarded Legion Belt
Bellegante's Fast Knock-out

At the boxing meet at Cardston last week and two young men of Redcliff made a splendid showing among the boxers from all parts of the province.

The champions from here are Pat Harrison an employee of the Dominion Glass Co. here and Carlo Bellegante who was former employed by the same company. Although Pat Harrison lost out in the final bout in his class he was awarded the highest honors that could be bestowed upon any Alberta amateur boxer. He was awarded the Canadian Legion Belt for the most outstanding performance during the two day finale. There was a feeling of disappointment last year that Carlo Bellegante should have been awarded the belt. Pat Harrison will hold the belt until next year.

Pat Harrison was in the 137 pound pound and Carlo Bellegante in the 175 pound open. Oscar Miller and Albert Lusk of Medicine Hat also won out.

Another Farm House Broken Into Near Town

Owner saw Lady Foot Prints
At The Door

We have just learned that a few days ago another farm house was broken into near town. When the owners came back to the house foot prints of ladies shoes were found.

The ladies stole a dozen or more some soda biscuits, a can of corn and a few other goods. The bachelor owners had been out putting in some grain and when they returned home they saw the foot prints and noticed a truck which had just driven away.

It was the first time they had left the house without locking the doors as they had only been a short distance from the house. They have a good idea who the thieves were and the poor bachelors lost the meal they had arranged for.

There is no heat or coal in anyone who would steal from farmers who have had no crops for several years.

Districts Close West Have Baseball League

Locals Asked Us Why Isn't
Our Team in It

Just west of town a baseball league has been organized with Brooks, Tilley, Rainier, Duchesne and Patricia and their appeal to be an interesting season ahead.

As we had a number of fair baseball players here in Redcliff last season and most of them are still here, why should our local baseball managers not try to join in with this league, referred to above. We often hear visitors and local citizens say: why hasn't a fair sized town with numerous young men have all kinds of sports for both summer and winter?

Explains Delicate Processes Used In The Production Of Bank Notes At Ottawa

In a large and imposing building on Wellington street, Ottawa, stands the home of the Canadian Bank Company, where Government bonds, postage stamps and bank notes are made. The building is a huge one. Its roof is of iron and steel. It is proof, for within its walls are many millions of dollars' worth of securities, and daily are printed thousands of bank notes, bonds, stock certificates and stamps. The entrance is guarded day and night, and no admittance may be obtained only by passport.

Writing in the Royal Bank Magazine, T. O. Goshorn explains how bank bills are produced. After the bank directors have decided on a general idea, the company artists submit designs, and when one has been accepted a facsimile is engraved on soft steel, which, when tempered, becomes the original die. It has this required several months.

The expert portrait engraver belongs to one of the three classes of artists in the world. Examine the vignette of portrait of King George V on the face of the one-dollar bill of Canada and note the perfect execution. When we realize how small the picture is, and that each fine line or dot has to be picked or chiseled out of steel by hand, do you wonder that the art of portrait engraving is so scarce? Only a dozen artists in America can do this delicate work up to the highest standard demanded. It takes several weeks and even months, to engrave a portrait or a picture vignette.

The work of the artist and the geometric lathes is mathematically perfect as the machines are set with geometric precision. Then the roller interfeeder falls down badly. He cannot produce this perfectly by hand.

The impression from an original die engraving is transferred to a cylinder of soft steel, which is then hardened and the cylinder's impression transferred to a large plate, which is then polished by hand and fixed with chromium to retain the impression of an inch to three-tenths of an inch, to prevent the engraving from wearing during the printing.

Bank note paper is made of linen and cotton. Before printing, the paper is dampened with water through water and then put in damp canvas cloths to cure. Throughout all stages of printing the paper is damp, which makes it pliable. A close record is kept of every sheet of paper as it comes from the mill. Through each process a separate printing has to be made for each color on both sides of the bill. Usually it requires from three to five printings, and, in case of multi-colors, many more. The ink is all specially made and tested to a standard.

From the press the bills are taken to a cool air drying room, the temperature and humidity being regulated by a thermostat. Forty-eight hours later they are passed through troughs of glue in the process called sizing. This gives the bill its glossy finish and keeps the signature ink from spreading. Next they go into hydraulic presses, smoothing out the wavy surface of the paper and closing up the pores. Next, the bills go through heating machines, and thence into the storage vault, which contains many millions of dollars. Nothing can be seen but money, money, money, piled high up to the ceiling.

Loans For Seed

West In A Different Position Than Other Parts Of Canada.

Because the Dominion government is guaranteeing loans for seed in the Western drought areas, farmers in other parts of Canada who have not should have their seed loans guaranteed, too. Which is nonsense. Many farmers in the drought area haven't had a crop for six years, which is surely different from the case of a farmer in some other part of Canada who may have had but one or two crop failures. If the Government is to be called upon to guarantee or provide everybody's seed, the money as well go into the business of collectivist farming, and have done with it. (Ottawa Journal).

A Real Diplomat

"Have you any experience in chinaware?" asked the prospective employer.

"Years of it, sir," replied the applicant.

"What do you do when you break a valuable piece?"

"Well, sir, I usually set it together again and put it where some customer will knock it over, and charge me for it."

"You'd do. Start work at once."

Money And Clothes

American Analysis Of The Cost Of Clothing For Men And Women

The season approaches when women, men and nature more or less lightly turn to thoughts of glad raiment. Hence it may interest you to learn what the well-dressed families of mid-America are spending these days on clothes.

A report by Dr. Louis Stanley, chief of the Agriculture Department's Bureau of Home Economics, covers the clothing budgets of some 8,000 white, non-religious, American-born men and women of all incomes group in seven small cities of the Middle West. From this you learn that:

The husbands spent an average of \$35 each for all their clothing; their wives averaged \$44 more.

For hats and shoes the husbands and wives spent the same—an average of \$25 each for hats and \$15 for shoes.

For coats the wives had a little the better of it, spending \$12 compared with the husband's \$7.

And for underwear, including silk stockings and nighties, milday spent \$10.50, her spouse an average, or \$10 a year against his \$5.

Prizeprie, or all other dress items, the wives averaged \$10.50, the husbands some \$4 a year for the wife, \$7 for the husband.

For tricot, the wives will have to wait, for the husbands' share is not included in the list of modern facts.

Dr. Stanley says, "Only in the highest income brackets did the wives of the Middle West spend noticeably more on clothes than did their husbands."

It goes without saying that as the incomes went up the couples dressed more luxuriously. With incomes of \$600 or less the husbands' annual clothing bill was \$16, the wives' \$20. With incomes of \$1,000 to \$1,500 the husbands spent \$19, the wives \$18. New York World-Telegram.

Knowledge Is Essential

Successful Farming Cannot Be Done In Haphazard Way

The farmers' sons, leaving our agricultural schools, appreciate very little of the real business of the foundation of our economic regime. It is in practicing it that strong generations perpetuate themselves, while in the city an artisan family is dispersed after three generations. In addition to its richness in maintaining knowledge, the earth renews itself constantly in nourishing products which agricultural science knows how to vary almost infinitely. The exploitation of the farm demands to-day, with its problems of production, distribution, co-operation, organization, such are the prime necessities of the agricultural class; only those who have adopted them can aspire to the superiority which the future of their profession assures them.

Getting The News

Reporters Now Being Wired For Radio Reception

And now it's the news reporter practically wired for sound. As reported by the Y.M.C.A.'s Radio Club in its experiments with five-metre radio, broadcasting, an Albany newspaper assigned a reporter to receive a radio call. From his desk in the newspaper's city room, the city editor kept in contact with his reporter by the short wave.

When a grass fire broke out in Montreal, Louisiana, the city editor despatched his radio-directed reporter and received the story direct from the scene.

This Cat Is Different

Katherine Bauman's 15-year-old cat, Felix, has never caught a mouse—in fact he's afraid of them. When Felix was a small kitten a mouse jumped out from under a basket of coals in the Bauman kitchen at Humboldt, Iowa. Felix made a frightened dash for a window curtain. And he's been running from mice ever since.

The sponge industry is among the oldest on earth. It is mentioned frequently in the literature of the ancients and Greeks, and is referred to in the Old Testament.

It can be hammered into a transparent sheet.

COMMEMORATING ONE HUNDRED YEARS OF STEAM NAVIGATION

Captain Ross Wallace, M.P., photographed above as he opened the exhibition to mark the Centenary of Trans-Atlantic steam navigation at the Science Museum, South Kensington, London. At the left of the picture is the Blue Bird Atlantic Trophy.

Game Bird Conservation

Three-Million Dollars Collected In Canada And U.S. For This Purpose

In the first annual meeting of Ducks Unlimited Canada at Winnipeg, the first of the "game birds" collected from conservationists in Canada and United States by the non-profit, sportsman's corporation, will be used largely in agricultural areas throughout the Dominion in an effort to retain water on land that ordinarily dries up in mid-summer.

The corporation is planning a major game bird conservation project and will send an engineer into suggested areas to analyze water-holes and marshes immediately.

W. G. Ross, K.C., of Moose Jaw, former president of the Saskatchewan Fish and Game League, was named president. J. H. Bauman, of Regina, was elected first vice-president. C. Leigh Spencer, of Calgary, second vice-president. R. P. Phillips, of Winnipeg, secretary, and Harold Eitel, Milwaukee, treasurer.

Marsh lands used unsuccessfully for agriculture during the past few years will be purchased from the present owners and developed into water-holes and marshes.

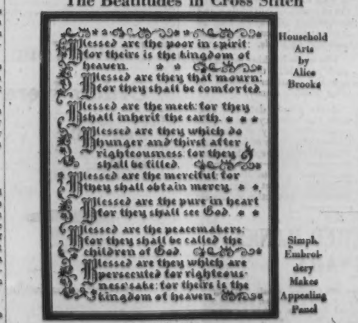

The Dominion and provincial governments are co-operating with the corporation in this undertaking, it was stated.

Safeguard Your Health

Dr. W. T. Crombie, superintendent of Queen Alexandra Sanatorium, London, Ontario, and noted authority on tuberculosis, has an unpleasant thought for us, according to Canadian Magazine. If people who were taken, he asserts half of the population of Canada would be shown to have tuberculosis, the fact that they should be in sanatoria, decidedly not, but they should protect themselves against the disease by taking the future of their profession assures them.

Newspaper reading is a pastime which cannot be abandoned even for one day. Skip 24 hours and you're apt not to know who's premier of France.

The Beatitudes in Cross Stitch

PATTERN 6007
This panel embroidered in cross-stitch adds beauty to any home. Pattern itself contains a transfer pattern of a 12 1/2 inch square, color chart and key, material needed, list of stitches and instructions. To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to The Review, Dept. 100, Winnipeg, Newsworld Union, 175 McLeod Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Grain Research Committee Approves Inclusion Of Thatcher Wheat In Grades

City Built In Pocket

One Reason Heavy Rains Caused Extensive Flood Damage

There are two chief reasons for heavy rains causing so much flood damage in Los Angeles.

The city is in a pocket and is surrounded by mountains down which the waters run with torrent rapidity. So many of the buildings, especially smaller homes, are of such cheap construction that they fall as readily as the house of the parable which was founded on sand and could not withstand the fury of the waters.

Heavy rains lasting for four days turned what had been dry washes (as they call the mountain stream) into rivers that ripped and tore at their banks. There was so much water caught in the mountains that when it reached the valleys it was like a series of young Niagara racing to the ocean. Flimsy buildings fell like matches and even more substantial structures such as bridges collapsed because their foundations had been washed away by the swirling torrents.

There is seldom any wind of any consequence in the Los Angeles region. The water just poured straight down in sheets.

A Puzzle To Science

Working Of Human Brain Has Never Been Understood

The difficulties faced by psychologists in their efforts to understand just what the human mind is and how it works, are frequently expressed by Dr. Fraser C. Judson Herrick, a noted psychologist.

If you took all the apparatus of electrical telephone and radio in North America, says this authority, and compressed it into a two-quart jar, you would still have an almost bewilderingly intricate than the human brain. It is any wonder that scientists still have a great deal to learn about how the mind operates?

What applies to the brain is true of individual parts, for instance the complex and intricate structure of the eye. It is not easy, it is not easy to recall, when the thought arises that the world is disordered or ungodly, that all our science and all the investigations carried on by countless experiments are not something created by man himself, but only attempts to find out and understand what is already there.

Win Scholarships

National Research Council Issues Awards To Students

Forty-nine scholarships have been awarded for 1929-30 by the National Research Council, according to a report issued recently.

The awards are somewhat higher than they have been for several years. Individual grants have been slightly increased, and provision has been made for supplementary salaries to those living beyond 300 miles from the centres at which they will continue their studies.

Saskatchewan winners are: Special, \$1,000, A. G. Brown, Lloydminster, graduate of Saskatchewan and McGill; \$750, A. D. Hogg, Lethbridge, graduate of Saskatchewan and McGill.

Studentship scholarships, \$500 (name of university in brackets): D. B. Chisholm, Regina (Alberta); D. B. Paul, Regina (Saskatchewan); Bursaries: \$500, K. C. McCallum, Scott (Saskatchewan); C. N. Penland, Regina (Saskatchewan); A. J. Sparrow, Saskatoon (Saskatchewan); G. Schneider, Weyburn (Saskatchewan).

Knows Fine China

Manufacturers Consider Queen Mary Is A Real Expert

Queen Mary is a "real expert on china" and occasionally visits antique shops in search of rare cups and plates. Paul Sala, Montreal antique dealer, just returned from a two-month tour of Europe, states: "At the British Industries Fair I saw Queen Mary examining some of the finest china. She knew the man who made them, so I asked him. He told me that Queen Mary is an expert on china and is well known in the trade as such."

King Carol II, of Romania, derives a large part of his income from his vineyards. Revenue from the royal domains approximates \$120,000 annually.

The associate committee on grain research in session at Winnipeg approved inclusion of Thatcher rust-resistant wheat in the Manitoba Northern grades. Curator rust-resistant wheat was found unacceptable for the same classification.

The committee, whose recommendations generally guide decisions of the Canadian board of grain commissioners, is studying various varieties of drought and rust-resistant wheats and their milling and baking qualities.

Two new varieties of high quality rust-resistant wheats were approved. These varieties, which will be grown further this year to obtain sufficient quantities for most commercial tests, are being "equal to Marquis" in milling and baking qualities and will rate No. 1 Manitoba Northern grade.

Thatcher, produced in Manitoba and Alberta.

Approval of the committee's recommendations by the Canadian board of grain commissioners will mean Thatcher in future will be recognized as being "equal to Marquis" in milling and baking qualities and will rate No. 1 Manitoba Northern grade.

Thatcher, produced in Manitoba and Alberta.

Further developed by the Dominion rust-research laboratory in Winnipeg, Thatcher is a new Manitoba Northern variety. A shipment was made to England early this year and it proved acceptable to Old Country buyers.

Coronation, which failed to meet complete approval, also was shipped to the United Kingdom for testing, but was found to possess milling characteristics differing materially from Thatcher. The Northern grade, definite recommendations were made to exclude this variety from the Northern grade, the associate committee announced.

The committee, an important part of the Dominion board of grain commissioners, has been in joint sessions with council members, Dominion agriculture department experts and the sub-committee on plant breeding.

Gas Eruption Above Sun

Huge Cloud Attained Speed Of 200 Miles A Second

Hydrogen and calcium gas erupting in a fountain-like fashion from the sun's atmosphere was reported by the Mount Wilson Observatory at Los Angeles.

The gas cloud was blown out by sunspot force to the greatest height yet observed, Dr. J. G. Hickox said. The gas cloud was blown out as high as 167,000 miles high when its tongues were first sighted. It speeded up to 200 miles a second and escaped from the sun's atmosphere.

The gas cloud was blown out as high as 167,000 miles high when its tongues were first sighted. It speeded up to 200 miles a second and escaped from the sun's atmosphere.

The gas cloud observed by Dr. Hickox, called a prominence by astronomers, surpassed the 425,000-mile record height of that seen last September by the Mount-Huilebert Observatory near Pontchar, Mich. The September prominence still holds the speed record of 435 miles a second and was much brighter.

The gas cloud observed by Dr. Hickox, called a prominence by astronomers, surpassed the 425,000-mile record height of that seen last September by the Mount-Huilebert Observatory near Pontchar, Mich. The September prominence still holds the speed record of 435 miles a second and was much brighter.

Much Talk

From Four To Six Million Words A Season

From 4,000,000 to 6,000,000 words a season is the approximate average now that issues annually from the House of Commons. The speech depends on the length of the session. And no matter how torrential or how mild the stream may be, every word is duly recorded for posterity in the pages of Hansard.

Hansard is issued in volume form some months after the close of the session. It is probably the most thoroughly indexed work extant. The daily distribution of Hansard is in the neighborhood of 5,000 copies.

"I would like to marry your daughter."

"One word first. Can you support 'family'?"

"Certainly, sir."

"Very good. I must tell you there are seven of us."

The United States has a new set of postage stamps. The one with the Statue of Liberty will be obtained for one of Roosevelt's 10-cent stamps.

Thanks For Things
As They Are

CLARA HOPPER

I was: C.P.R.-ing
Over the prairie
Where flat things are flatter
Than ordinary,
Far things are farther,
Near things nearer,
High things higher,
Here things here.
Earth, a shorn sphere,
Went whirling and whirling;
Twisting and twirling
Around to the rear;

Whirlwind said how the world, wild
beasts,

Fate, fabled for treas,
Stranded in aviation here
Till I feared we'd be hurled
To some five-pointed world.
But the wind fell asleep
As the sky fell aflame;
And my fears fell away,
And the Past filled a frame . . .

I saw the lean Indian
Trudging and trailing . . .
I heard the dry River carts
Screaming and wailing . . .
I gave thanks I live now!
And here—and how—
And not on a star's
Due's
Mere,
Where they're no C.P.R.'s!

NOTICE

An invitation for a limited
number of tennis players to
join as associate members for
the season 1968 of the tennis
club situated on 4th street
(Just south of the Baptist
Church) is cordially extended
to those interested.
The fee is \$1.50 each for
the season.
Associate members are not
expected to take part in the
upkeep or maintenance of
the court.
Written applications
should be sent to Mr. Lums
P. O. Box 46, Redcliff, be-
fore Friday May 6th 1968.

CREDIT

It belongs to you—the community
does not own it.

BANKS live by lending.

That is their major source of income, their
principal business. They are always on the lookout
for good risks. They have to avoid poor ones.

Let us give an instance. Suppose, say, a man
seeking a bank loan, is known to the banker as
having no business capacity to carry out the pur-
pose for which he wants the money. He is not
credit-worthy—he has accumulated nothing, has
no stake.

The banker, anxious though he is to make loans,
knows there is not the remotest chance that this man
would succeed in his purpose and tells the would-be
borrower that the bank cannot take the risk.

But this man has a friend—a
man who has accumulated some-
thing and has a stake. Hearing
of his neighbour's difficulty, he
goes to the bank and urges that
the loan be made.

"Whose money would you
have me lend him?" asks the
manager. "Yours have a deposit
here. Would you lend your own
money?"

"Not on your life," retorts
Mr. Blank. "Lend him the
bank's money."

The bank manager, as cus-
todian of this very man's own
money, then takes pains to
point out that what the sub-
stantial citizen is really expect-
ing, is that the bank should
make a loan which the citizen's
own common sense and caution
would compel him to refuse.

Before such a man leaves the
bank he usually agrees that he
had expected the bank to lend
where he himself would be un-
willing. Banks have no magic
source of credit.

Here is the core of the whole
business of a bank's extending
credit. Because of the bank's
responsibility to its depositors
it can make loans only where
repayment is reasonably cer-
tain.

To obtain a loan from a bank
a borrower must have credit of
his own. Seldom, if ever, is his
credit spendable. You cannot
spend cattle, goods in process of
manufacture, uncaught fish, un-
cut timber, or wheat in the
granary.

The bank has credit too.
Millions of small depositors
have, in effect, lent it their
money. A percentage of this
money, based on bank experi-
ence of withdrawals, is kept in
cash, some more in items of a
cash nature, more still in assets
quickly convertible into cash,
and more in safe investments
such as marketable government
and other bonds. Based upon
this, the bank can extend credit.

Because people have con-
fidence in bank credit, and be-
cause every promise-to-pay of a

chartered bank is redeemable in
cash, on demand, or on a fixed
date, this form of credit is
spendable.

In the case of the borrower,
credit is the personal possession
or attribute of the individual—
you yourself, if you are the bor-
rower—in character, goods,
possessions, integrity, ability
and willingness to repay.

Your credit is not social, in
the sense of belonging to the
community. When you have
credit, it is your own just as
your money in a savings ac-
count is your own. The people
at large have no conceivable
claim upon it.

Who monetizes credit?

The answer for all practical
purposes is this: The man who
owns and therefore controls his
credit takes the initiative. The
bank does not go to him. He
goes to the bank and asks it to
enable him to obtain credit in
spendable form in exchange for
his own unspendable credit.
The bank does so, and charges
him a rental in the form of
interest, until he repays.

What happens when he se-
cures this credit in spendable
form?

He spends it.

He pays the wages of labour,
the cost of raw materials and of
manufacture; the cost of seed,
of feed for hogs and cattle, or
the expense of cultivating and
harvesting; of buying bait or
catching fish; of cutting trees or
transporting goods.

The whole banking process is
made possible by the concentra-
tion and cautious handling of
other people's money.
Banks simply dare not risk
their own solvency and so jeop-
ardize the safety of their de-
positors' funds, by making loans
to people who have neither char-
acter nor credit—nor by mak-
ing loans even to those who
have both, without taking every
reasonable precaution to ensure
repayment.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking
with you. He will be glad to answer your questions, from the
standpoint of his own experience. The next article in this
series will appear in this newspaper. Watch for it.

WORLD HAPPENINGS BRIEFLY TOLD

Permission for permanent residence in Canada for Haskilly Thompson, Winnipeg journalist, has been approved by immigration authorities.

Soviet Russia, having explored the far north from its ice floes and skies, has begun to send scientists into it depths.

Col. B. T. Wood, newly-appointed commissioner of Royal Canadian Mounted Police, has been named a member of the Northwest Territories council.

A group of German and Austrian refugees arrived in New York on the British liner *Antonia* to accept the United States' offer of political asylum.

Thirty radio stations will be built in Canada for airways service, Hon. C. D. Howe, transport minister, told the House of Commons. At present 11 were completed, 12 are under construction.

The real reason back of the Japanese invasion of China is a desire to get control of China's raw materials and its market, according to Dr. Heng Chih Tzu, eminent Chinese educator.

During the three months ending March 31, the United Kingdom's foot-and-mouth epidemic necessitated slaughter of 10,012 head of cattle, according to official statistics in *The London Gazette*.

One hundred and seventy-five employees of the nut and bolt department of the Nova Scotia Iron and Steel Company, walked out of the plant in protest against one worker's refusal to join a union local.

John Kanevitz, Chicago taxicab driver, found in his cellar a cold muffled drum, the reign of King George III, bearing the date 1763. Slightly larger than a modern ten cent piece, believed to be a sign of the George III period.

Country Is Primitive

Albania Has No Railways And Few Good Roads

When Countess Apponyi married King Zog of Albania this spring, she will step from the 20th century atmosphere of Budapest, Vienna and Paris to the primitive conditions of the Albanian capital. She will share the newest Tirana in Europe and rule over a country of a million people, hundreds of whom are divided by feuds which have lasted for generations.

Albania has no equivalent in Europe. There are no good roads, communication is still predominantly by mule track, and despite King Zog's attempts to modernize his mountainous kingdom, only faint traces of western influence are to be found in the capital cities, Tirana, Durazzo and Scutari. The capital Tirana, largest town in the country, has barely a population of 20,000.

Albania remains the only country in Europe whose telephone system is not linked with the international lines.

Although women are safe anywhere in Albania, they are not seen in the street, and most of them are veiled. They cook for their husbands and for their husband's guests, but they do not eat at the same table—Montreal Star.

Issues Warning

Say No Jobs Open At Present In Northern Mining Camps

Hon. T. A. Cress, minister of natural resources, issued a warning to men contemplating seeking work in the Northwest Territories and Yukon, that there are no jobs open at present in the mining camps in the Yukon, north of Great Slave Lake, 400 miles north of Edmonton.

Based his advice on information received from the district agent of the Mackenzie district, who said the sub-mining recorder at Yellowknife, the minister said forecast increase in mining activity at Yellowknife would not result in increased employment until possibly late in June.

The department was discouraging men from going to Yellowknife or elsewhere in the Territories in search of work because the mining companies were making their own arrangements outside and taking in only those for whom they could assume full responsibility, Mr. Cress said.

The body temperature of a person living in the extreme cold of the far north is almost identical with that of one who resides in the steamy tropics.

"I read the other day that it takes only the smallest fraction of a second to wink your eye."

"Yes, but it takes the greatest part of a day to explain it to your wife."

Motor Car Of The Air

British Designer Producing An Aeroplane With All The Comforts Of A Motor Car

Secret tests have been carried out at the Barton airfield, near Manchester, of a new type of airplane, described as "the motor car of the air," which is to be produced by a Manchester firm and marketed at a price under £200. Equipped with an 80 h.p. engine, the plane is built almost entirely of welded steel, and is being designed to interest the Australian farmer, whose nearest neighbor may be 200 miles away.

The object of the designer, Mr. Norman Sykes, has been to produce an airplane with the comfort and facilities of a motor car. It has a large door on each side of the cabin, easily entered from the ground. Inside the cabin one finds the controls, seating, windows, and rear-view mirror exactly as in a car. Turning on the ground or in the air is accomplished by using a steering wheel.

The landing wheels are fitted with shock absorbers by a foot pedal. The wings are fitted with air-brakes, or "flaps," worked by a hand lever similar to the hand brake of a car. Price, London devotes have been introduced, which, once the craft has been put on the spot, lock the controls, allowing the pilot to relax—Industrial Britain.

A Crucial Point

Says Canada Is Suffering From Growing Pains Under New Conditions

Premier T. D. Pattullo of British Columbia said in an address to the Empire Club of Toronto and the Canadian Club, that Canada is suffering from growing pains under new conditions and demands consequent upon economic and social changes.

"It is necessary that remedial measures should be applied in order that all parts of the Dominion comprising confederation may prosper individually and collectively."

Confederation as conceived by the men who brought it about "seems threatened by dissension, misunderstanding and sectional determinations."

But Premier Pattullo suggested existing differences of opinion were less wide than those prevailing between the Fathers of Confederation themselves.

FLIN FLON

"The Story of Its Finding and Position Today"

By FRANK RUSBY

"BLING"—THE FIRE DOG OF FLIN FLON

Just a bushy Borton Bull, white mane and tail, was "Bling" Flin Flon, but he was a self-taught fireman, believe it or not.

He was born in 1902 and ever since he was a half grown pup has attended every fire drill and every fire, summer or winter.

They used a siren for a fire call in Flin Flon and they also use it to summon bluffs in the open air. "Bling" will be on hand like a flash from a gun on a fire signal, but disinterestedly to budge for a blare call. How does he know the difference?

He has established a patrol route of his own which entails a blow-down the main street, across and up the others, and back to the main street, always on hand before even the fire is just at the end of the main street. He climbs to the highest point on the engine and bangs a bell.

"Bling" knows every fireman and policeman in Flin Flon, and his apparatus on the motorized engine. It's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

I saw this dog jumping through the water from the pump, and when it caught him full on, he rolled like a rubber ball. Back he came and the transformation from white to black as he was covered with mud, then up by the hose, and several black to white. The dog was very smart and later from the story above.

"Bling" is a leader man, attends all fire drills and every fire, summer or winter. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement. He's a siren to see him help pull the hose off the reels, bawling and barking in great excitement.

Rule Has Been Changed

Quite Correct Now Put Truck Drivers In Your Soup

Emily Post finally broke down the other day and admitted that it is O.K. to put truckers in the soup if only a few are put in at a time. She probably will not admit to confirmed crack smokers, who are persons of individuality and strength of character, but such a rule as the above will be a boon to those timid people who are more afraid of the rule of etiquette, made by Heaven, than they are of the men who are smashing the moral law.

For the first time in years a lot of folks will now know how soup, and particularly oyster soup, tastes when consumed as the cook and nature intended.—Detroit Free Press.

Nothing New About Them

Mesopotamians Had Fully Equipped Bathrooms 5,000 Years Ago

Discovery of a prototype of the modern bathroom in Mesopotamia of 5,000 years ago was disclosed by Dr. Allen B. Albert, Jr., of Bessey-Wesley Theological Seminary, Chicago.

"The buildings had regular bathrooms, fully equipped like those of the present day, with seats, wash basins and other facilities not greatly unlike their modern counterparts," he said.

A Clever Horse

Nods And Shakes Its Head In Answer To Questions

Pride of Redbank county, Ont., is a horse able to answer yes and no at the right times.

"Do you want a drink of water?" asked the owner, George, Goss, of the horse. "No," the horse answered. The owner asked if more was wanted. The horse replied with a nod and a shake of the head. Closing and opening doors on verbal orders are included in the horse's tricks.

Gardening

There are hundreds of annual flowers which may be satisfactorily planted by the person who is not going to stay long in one place. These annuals will make their full growth in a few weeks and bloom profusely from next June until frost. Vegetables may be planted in the garden in a few weeks and will give ample returns in the main year.

Even a fair layer of grounds can be carried out by a tenant. Quick growing grass will make a very fine lawn in less than six weeks and one which is better than the patch of mixed grass and weeds. Instead of perennials, shrubs and trees.

A perennial of any good seed catalog, will disclose many bushy annuals among the flowers and some climbers which will grow up to 20 feet in a few months. There are at least a score of big, bushy annuals which give the gardener a great deal of pleasure and can be used for screening shrubs. They are effectively as tall, showy growing shrubs.

The first of the garden peas, leaf lettuce, radish, and spinach will be among the earliest vegetables now. These may be planted now on the ground is fit to work. All of the first named seeds should be sown at least three times, at intervals of ten days so that there will be a succession of vegetables. The second sowing will be carrots, beets, onions, potatoes, etc. in a bush can stand a little frost, and then beans, corn and tomato, cabbage and cauliflower plants, etc. which will with frost. Plant seedlings or planting will be those hot weather vegetables like lima beans, squash, well started egg and pepper plants, cucumber, melons and similar things.

A constantly cultivated garden, will seldom be affected by drought. This stirring of the top soil prevents evaporation of moisture and it also keeps down those robbers of plant food and water—worms. Especially during the early part of the season is cultivation necessary, and more particularly after each shower. With some of the many hand, horse or tractor methods of garden work, the market, this task is done quickly and without the old time backache.

Build Air Ports

British To Spend Large Sum For Construction Of Airports

Approximately 10 per cent of the £100,000 (£141,950,000) 1930-31 budget will be utilized for immediate construction of airports and other ground establishments for the Royal Air Force. It was announced by the Air Minister.

Plans include concrete buildings to house officers and men, hangars of various sizes with special anti-aircraft defences, and underground fuel storage tanks. Construction of new hangars, and the building of roads, extensive gas, electric, and water facilities and the building of roads.

Although motorcycles did not attain the peak of their popularity until 1912, their examples of them existed in France and Germany as early as 1885.

Indirect ray detectors are used on modern vessels for detecting other vessels and icebergs through dense fog.

Shipment Has Been Stopped

United States Not Letting Germany Have Helium Gas

A sudden change of mind of the United States government has brought about a new situation on the question of helium and its export. Until now it has been the policy of the United States to allow the export of helium in large quantities, but now it has been given by Congress for the delivery to the German Zeppelin Company, which Herman Wilhelm Goering, air minister and Nazi No. 1, is a member of, 17,000,000 cubic feet of helium for use in the new dirigible constructed by Germany to replace the ill-fated Hindenburg which exploded with heavy loss of life at Lakehurst, New Jersey.

Reports from Washington reveal that Secretary Baker has blocked the shipment, despite the fact that tank ships from Germany to the United States, the Texas coast in the Gulf of Mexico to take away the expected supply.

For the time being, the supply of helium, a non-inflammable gas, without which dirigible construction and flying are foolhardy, is to be found only in the United States, which thus controls the safe lighter-than-air flying.

As a result of the new decision, in a spirit of international generosity, the United States has expressed willingness to share its helium supply with the other nations of the world, industrial enterprises of other nations, Germany particularly. The latest development is interpreted in Washington as arising from the government's failure to receive satisfactory assurances from Germany that the helium will not be used for military purposes but will be devoted only to commercial and industrial and medical uses.

Repercussions of the Nazi coup in Austria are indicated also in the report that there is a growing inclination on the part of the United States navy to complete negotiations with Germany to permit the use of dirigible to use the navy's mooring mast at Lakehurst.—Buffalo Courier-Express.

Farm Accounting

Importance Of Having A Record Of All Business Transactions

Modern farming is a business and to be successful should be conducted in a businesslike manner. Farming has developed to the stage where it is a commercial enterprise in which the character of the management largely determines income and profit. It involves the production and sale of commodities as well as the use of capital and the purchase of supplies and labour the same as most other kinds of business.

Present conditions in farming emphasize the importance to the farmer, of having a record of his business transactions as well as a permanent record of other details of his farm enterprise to which he can readily refer.

The farmer who fails to keep a record of his business is in a position to meet conditions in such a way that his farm will give him the most satisfactory net returns, year after year, out of the use of his investment, his labour and his managerial ability. Many farmers realize that the farm is a business and that the combination of enterprises or methods of management might increase the net returns. They may be unable, however, to determine what changes to make owing to a lack of record of the business. An adjustment in the farm business and points out the holes through which the profits have leaked.

A Farm Account Book may be procured from the King's Printer, Ottawa, at a nominal price.

Schools of Johannesburg, South Africa, are crowded, and 1,500 children are on the waiting list.

Canned oatmeal is something new in cereals.

Awarded McKee Trophy

Romeo Vachon Honored For Services To Canadian Aviation

A flyer since the early 1920s and instrumental in developing air services along the north shore of the Gulf of St. Lawrence in recent years, Romeo Vachon was awarded the McKee trophy for service to Canadian aviation during 1937.

In making the announcement, Defence Minister Ian Mackenzie and Vachon "throughout his career has been outstanding in his dual capacity of pilot and air engineer."

It was due to his foresight and administrative ability that there exists today the efficient and necessary air service along the north shore of the Gulf of St. Lawrence," the minister added.

"Mr. Vachon's qualification for the award is not dependent on any spectacular feat in aviation but on the quiet, but not less, untiring effort which has earned the admiration and high regard of everyone connected with aviation in Canada."

The Metropolitan Museum of Art, in New York City, has one of the best collections of jade in the world.

Employment for nearly 500,000 persons normally is provided by the railroads of Great Britain.

Termites, or white ants, are not true ants and are in no way related to them.

Turned Down Award

Paul Muni Refused To Accept Statue For Fine Acting

"Paul Muni, motion picture actor, rejected an award for good acting when he returned from Europe. 'I don't accept any of those things, he said.

A representative of the Manitoba Foundation had gone down to the bay to meet Muni's boat and present the trophy. Muni, however, refused to accept the award, a bronze statue, for Muni's interpretation of the role of Emile Zola. When the ship docked, the foundation's representative went away disappointed, still carrying the statue.

That Women Are Exceedingly More Superstitious Than Men

The question of who is more superstitious, women or men, has been solved at Simcoe, Ont., to the satisfaction of one observer. A leader league agent, invited to give a lecture, and in five minutes, according to strict computation of 60 people who passed by, 38 women and girls made a detour. Only six men bowed before the old superstition. The remainder walked through the lecture.

A hotel in Nagasaki, Kenya, is divided by the equator. A strip of seating was run right through the hotel. A retired naval officer, Commander Hook, held the position early in 1935.

Indirect ray detectors are used on modern vessels for detecting other vessels and icebergs through dense fog.

are prepared for the School
Music and Dramatic Festival
in Medicine Hat Thursday and
Friday this week.

Since 1930 Canada has dis-
bursed a total of \$308,742,859 on
relief of varied forms, according
to report of Dominion Commis-
sioner of unemployment relief.

Saskatchewan farmers are now
optimistic over crop prospects
as they have recently had sev-
eral heavy showers of rain. Con-
dition here are also promising.

Officials of the P. F. R. A. met
E. L. Gray, Liberal leader of the
province, in Medicine Hat last
Saturday and had a conference
in connection with local irriga-
tion projects.

Redcliff and district had a
fine rain fall last Monday and it
soaked in nicely. Now prairie
and lawn grasses have a fine ap-
petizing growth in places which
seemed in.

The provincial Department of
Agriculture has issued new regu-
lations in connection with the
issue of fishing licenses in
Alberta. Anglers are now re-
quired to wear badges.

wife of a brother of Mr. Frey of
Redcliff, passed away last week-
end in Medicine Hat.

Mr. Dave Broadfoot has pur-
chased the R. N. Rose house on
Fifth St. and he is now making
improvements and renovation for
renting in the near future.

Saskatchewan's provincial
election is predicted for early in
June. Already 70 candidates
have been nominated. The
members to be elected were cut
from 55 to 52.

Premier Aberhart has recently
purchased a fine new Buick
auto very much the same kind
of one that the Duke of Windsor
purchased for his Ducies. Our
premier has reached plenty in
the midst of poverty.

Snow storms and heavy rains
this spring have delayed farmer
from getting seed in later this
season. In seasons of this kind
in past years crops have always
been good and have developed
in good time. Conditions now
are optimistic.

Much of Southern Alberta
and a large portion of Central
Alberta is threatened with the
grasshopper plague this coming
summer and warning maps have
been issued by the Federal De-
partment of Agriculture showing
the prospective degree of infes-
tation in the different districts.

Mr. William Davidson, who
has been farming in the Bowell
district for a number of years,
died suddenly last Tuesday. The
funeral will take place this after-
noon. Service will be held in
St. Ambrose Church and will be
conducted by Rev H. B. Hanesett.
Interment will be in the Redcliff
cemetery.
